

# The Healer's Stance

## *Working at the Edge*

Taught by **Core Individuation™** founder Desda Zuckerman.

### **Are you Sensitive?**

*Many in the healing profession, especially hands-on body workers have a difficult time clearing themselves completely from one session to the next. Even if they have great technique and personal integrity, for them, the Edge is the missing piece. It has nothing to do with **what** to do and everything to do with **how** to do it.*

-Desda Zuckerman

Many nurturing people feel empathetic when they merge with another to be of help, caring for them by feeling their pain. With the Core Individuation™ technique of the Edge it is unnecessary to process someone else's emotional, psychological, spiritual and physical energetic debris and yet still make a real connection.

**Working at the Edge** is a relating style that has the compassionate stance required for empathy and the distance necessary to know nobody is defined by their hardship, disease or lack of balance but instead, by the beauty at their Core. Real transformational work can only be accomplished from the place of safety and ease offered from the witness chair. This is it, the seat in the human structure of observation, discretion and personal distance. It is sanctuary for the weary, the home of the healer's stance, where it is possible to interact safely with even the most toxic of life situations.

---

#### IN THIS WORKSHOP YOU WILL LEARN HOW:

- To read, receive and interact with energy outside of us
- To learn to interact with others with more awareness, safety, compassion and effectiveness
- The Basic Anatomy of the Layers of the Human Structure
- To find your Edge
- To make a connection at your Edge
